PROFESSIONAL SUMMARY

Computer Systems Engineering graduate (QUEST Nawabshah) who builds full-stack web and Android applications with Django, FastAPI, React/Node.js, PHP/MySQL and Kotlin. Built an NLP-based CV-parsing recruitment platform (~95% accuracy on ~100 test CVs) and a POS and credit-ledger system for a family shop, backed by 2+ years of customer service, cashier and billing experience. Seeking remote or hybrid software roles in Pakistan.

EDUCATION

Bachelor of Engineering in Computer Systems — QUEST Nawabshah Sep 2022 – Aug 2026

Intermediate (Pre-Engineering), BISE Sukkur — Grade A 2020 – 2022

Matriculation (Science), BISE Sukkur — Grade A 2018 – 2020

PROJECTS

AI-Based CV Banking & Recruitment System | Kotlin, Django, spaCy — Final Year Project, 2025 – 2026

- Recruitment platform with CV upload, job posting, recruiter dashboard, AI job recommendations and video interviews; built the Kotlin app and contributed to the Django backend; wrote the proposal and documentation.
- Developed the spaCy NLP parser extracting name, email, education, experience and skills; ~95% accuracy on ~100 test CVs.

Siraj UPS & Solar – Shop Management Software | Python, Django — Windows desktop app | GitHub

- POS billing (search by name, SKU or barcode; PDF invoices), inventory with low-stock alerts, supplier purchases, customer credit (udhaar) ledger, repair-job tracking and Admin/Cashier roles.
- Packaged as a portable Windows EXE, also usable from other shop PCs via browser; wrote the user manual.

Digital Khata Book & Accounting App | Python, FastAPI, SQLAlchemy, Chart.js — GitHub

- Bilingual (English/Urdu, RTL) ledger app: udhaar/wasooli entries, running balances, JazzCash/EasyPaisa records, WhatsApp reminders, profit/loss reports, CSV export and a Chart.js dashboard.
- FastAPI REST API with JWT authentication and per-business data isolation; covered by a pytest test suite.

C Cube Event Management System | HTML, CSS, JavaScript, PHP, MySQL — Solo project | GitHub

- Full-stack event website: competition registration, fee payment, and an admin panel to check payments and approve registrations.

PizzaHub – Pizza Delivery Web App | React, Node.js, Express, MongoDB — GitHub

- MERN ordering app with cart, order tracking and an admin portal (menu CRUD, order dispatch); JWT, bcrypt, role-based access and server-side price checks.

EXPERIENCE

Customer Service & Cashier (Billing) — Siraj UPS & Solar (family business) 2+ years

- Served customers, handled cashier duties, billing and payments; used this experience to design the shop's management software.

Python Development Intern — ARC Reactor Technology, Karachi (On-site) 4 weeks

- Built a weather forecasting app in Python using the OpenWeather API, with Matplotlib charts.

Data Science & Analytics Intern — DeveloperHub Corporation (Remote) 6 weeks

- Cleaned and visualized 5 datasets using Python.

TECHNICAL SKILLS

Languages	Python, Kotlin, JavaScript, PHP
Web	HTML5, CSS3, React, Node.js/Express, Django, FastAPI, REST APIs, JWT
Mobile & Databases	Kotlin, Android Studio | MySQL, MongoDB, SQLite
AI & Data	spaCy, Scikit-learn, Pandas, NumPy, Matplotlib
Tools	Git, GitHub, VS Code, Linux, pytest, MS Office

CERTIFICATIONS & LANGUAGES

Certifications: Data Science Training, PITP, Sukkur IBA University (Jan – Mar 2026) | Google AI Professional Certificate, Coursera (Aug 2026) | Software Engineer Job Simulation, Forage (Aug 2026)
Languages: English (Professional), Urdu (Native), Sindhi (Native)
